

About Jason Associates Corporation

Overview Jason Associates Corporation (Jason) is an employee-owned small business providing technical and environmental support services to government agencies and companies nation-wide. Jason offices are located in San Diego, CA; Salt Lake City, UT; Las Vegas, NV; Idaho Falls, ID; and Yuma, AZ. Jason also has project offices located in the Washington, D.C. area, Richland, WA; Oak Ridge, TN; and Albuquerque, NM. Jason has a long and successful history of providing comprehensive technical and administrative support services to Federal, state, and local governments, and private-sector clients.

History Founded in 1987 as a minority-owned business, Jason was established to provide specialized technical services to the Federal government. Jason has received awards of excellence from the U.S. Small Business Administration and the U.S. Department of Energy, including the U.S. Small Business Administration Person of the Year Award, presented to Paul Nakayama, the owner and president of Jason, in 1992 and 1996. Today, Jason continues to serve clients in a "... supportive, creative, reasonable, cooperative, and flexible..." way, as stated in a recent client's description of Jason's performance.

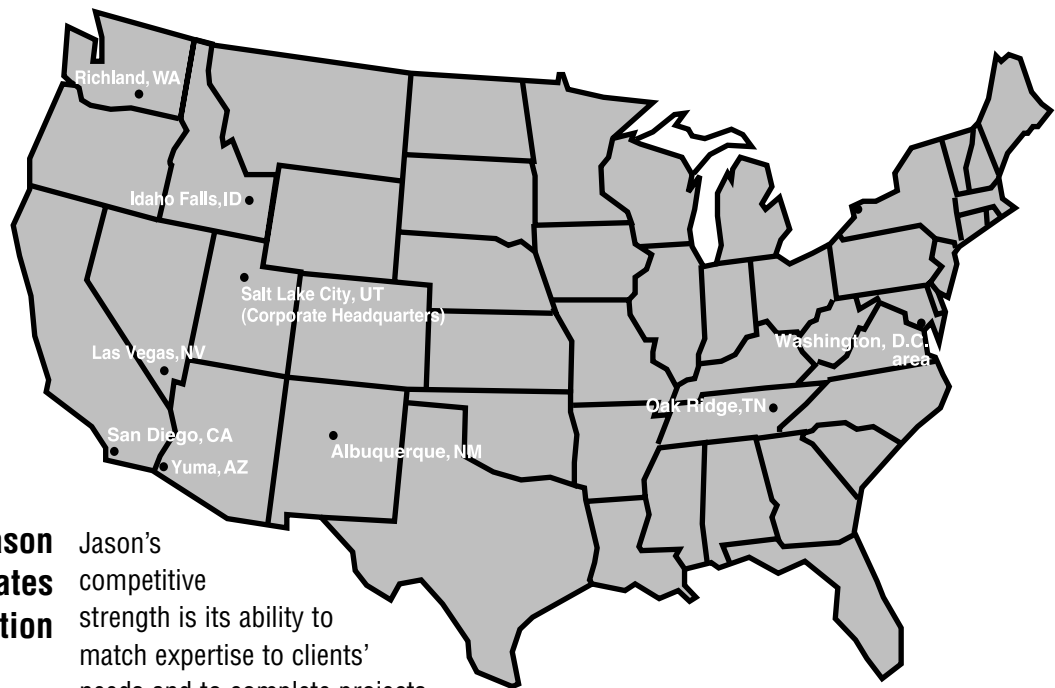

Professional Staff Jason has grown by adding technical and professional staff that are recognized nationally in their fields. Today Jason has over 100 scientists, engineers, environmental specialists, safety analysts, and communication specialists. Over 65% of Jason staff hold degrees and, of that, 29% hold advanced degrees. Jason's professional staff includes program management specialists, NEPA specialists, environmental scientists, environmental engineers, biologists, safety engineers, nuclear physicists, risk analysts, information technology specialists, public involvement and communications specialists.

Corporate Capabilities Jason's core environmental services business focuses on the management and support of environmental compliance projects and the management and support of environmental restoration and decontamination & decommissioning activities. Jason's current client base includes all levels of Federal, state, and local government and private-sector clients. The professional qualifications and experience of Jason's staff allow Jason to build specialty teams to provide support in the following areas:

- On-Site Support Services
- NEPA Compliance
- Environmental Services & Technical Support
- Waste Management
- Program Management
- Integrated Land Use Planning
- Natural Resources Management Planning
- Safety Assessment
- Information Technology Systems & Products
- Public Involvement & Communications

Performance Jason's clients and projects speak for Jason's performance. Here are some current Jason's projects and clients:

- Department of Energy, Office of Civilian Radioactive Waste Management – Yucca Mountain EIS
- U.S. Army, Yuma Proving Ground – On-site Environmental Support
- Department of Energy, Idaho National Engineering Laboratory – Environmental, Safety, and Community Involvement Support Services
- EnviroCare of Utah – Low Level Waste Management Consulting
- Department of Energy, Richland Area Office – Hanford Comprehensive Land-Use Plan EIS
- U.S. Navy – San Clemente Island Ranges and Operational Areas EIS

Selecting Jason Associates Corporation

Jason's competitive strength is its ability to match expertise to clients' needs and to complete projects on time and within budget. Jason's customers know, based on past experiences working with us, that Jason gets the job done, and done right.
